GYRO CHUCK

ABOUT GYRO :

FALCON GYRO made up with disc. When its mounted it can rotate rapidly about an locating axis which is itself free to alter in radial & angle move. The position of the axis is not affected by tilting of the disc, So gyro can be used to provide the centre alignment CNC & Turret lathe.

FEATURES:

- * Improves cutting accuracy & tool life
- * Reduces the total machining time
- Prolong the tool life

APPLICATION:

- * FALCON GYRO allows smooth and easy adjustment of radial and angular misalignment between chuck & turret.
- * FALCON GYRO reduces total machining time by possible to complete machining of holes in one drilling step and achieve tolerance as close as 0.01mm.

ADVANTAGES:

- * Easy adjustment for correcting misalignment between chuck & turret axis.
- * Quick functional adjustment is made on machine by mandrel and bush kit.
- * Tool clamping with ER collets & ER sealed collet jet Collets will be precise for processing.
